"In Selling Position"

Alberta Wheat Pool members should appreciate what it means to the Central Selling Agency to have Pool wheat in "a selling position."

To make the best sales Pool wheat should be in a position where it is instantly available, and where long and troublesome delays are never incurred.

When Pool wheat is in Pool elevators the Selling Agency can depend upon it being directed wherever it is wanted. For that reason, if for no other, Pool wheat should be delivered to Pool elevators.

Beside this, Pool elevators give Pool members an assurance of fair treatment to an extent never known in the days when their was no Wheat Pool.

You can best aid your Selling Agency and your own elevator system by delivering your wheat to Pool elevators.

School Fair Directors Prepair For Sept. 13

A meeting of the directors of Oyen School Fair was held at the home of Mrs. C. S. Wright last Thursday evening, and preparations were made for the annual fall fair, which will be held on Friday, September 13.

The following committees were appointed for placing school fair work:

Vegetables: Mrs. R. E. Gillespie and Mrs. A. G. Langmuir; **Flowers:** Mrs. S. A. Miller; **Grains and Noxious Weeds:** Mr. Thos. Lees; **Livestock:** Dr. J. P. Kerr; **Cooking:** Mrs. J. J. Purcell and Mrs. C. L. Dunford; **Industrial Art:** Mrs. E. MacArthur and Miss C. Desmond; **Penmanship and Composition:** Phyllis Lynett; **Elementary Science and Geography:** Rev. H. C. Woods; **Sports:** Mr. G. A. Gosselin, manager, and Messrs. H. R. Chapin, G. A. Morrison, P. A. Watrin, D. Warwick, E. H. Church and W. J. Hyler; **Field Manager:** Mr. C. L. Dunford.

Mr. J. J. Kelly has donated a cup for the school giving the best demonstration in physical culture exercises and the fair association will give \$10 as second prize and \$5 as third prize, the prizemoney to be used by the winning schools for the purchase of sports equipment.

The following rules were passed and all schools participating in the fair are asked to note:

(1) That no school work will be accepted after 10.30 a.m. on Friday morning, September 13.

(2) That no school work shall be removed from the fair building until 4 p.m.

(3) That the parade will start from the fair building at 1 p.m., and judging will take place in front of the grandstand. The physical training exercises will follow, after which the remainder of the afternoon will be devoted to sports.

All schools are asked to get their work in early and facilitate the work of the various committees.

Well! How About It?

Migratory Birds Convention Act

A summary of the Migratory Birds Convention Act is given below. This is the law which is based upon the Treaty with the United States. Any enquiries concerning this law may be addressed to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

Open Season, Both Dates Inclusive

Sackatchewan: Ducks, Geese and Coots, Sept. 15, Dec. to 31. Wilson's or Jack-Snipe, Sept. 15, to Dec. 31.

Alberta: Ducks, Geese and Coots, north of the Clearwater and Athabasca Rivers, Sept. 1, Dec. 14. Wilson's or Jack snipe Sept. 1, to Dec. 14.

Ducks, Geese and Coots, south of the Clearwater and Athabasca Rivers, Sept. 15, to Dec. 14. Wilson's or Jack snipe, Sept. 15, to Dec. 14.

Closed Seasons

There is a closed season in the Provinces of Saskatchewan and Alberta on Swans, Wood Duck, Elder Duck, Cranes, Curlew, Willet, Pintail, Upland Plover, Black-bellied and Golden Plover, Greater and Lesser Yellow-legs, Avocets, Dowitchers, Snipes, Knots, Oyster-catchers, Phalaropes, Stilts, Surf-birds, Turnstones, and all the shore-birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds: Auk, Auklet, Bittern, Fulmar, Gannet, Grebe, Guillemot, Gull, Heron, Jaeger, Loon, Murre, Petrel, Puffin, Shearwater and Tern; and there is a close season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadowlarks, Nighthawks, or Bull-bats, Nuthatches, Orioles, Robins, Shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Warblers, Waxwings, Whip-poor-wills, Woodpeckers, and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest migratory birds during the closed season. Sale of these birds is forbidden.

The killing, capturing, taking, injuring or molesting of migratory insectivorous and migratory non-game birds is prohibited. The possession of legally taken migratory game birds is allowed in Alberta until March 31, following the open season, and in Saskatchewan until the last day of February following the open season.

Daily Bag Limits

Sackatchewan—Ducks and Geese, 30 of all kinds in one day, but not exceeding 10 geese, and 200 of all kinds in a season but not in excess of 30 geese; Coots 25; Wilson's Snipe 25.

Alberta—30 in one day and not more than 200 of all kinds in a season; Geese 15; Coots 25; Wilson's Snipe 25.

Guns and Appliances

The use of automatic (auto loading), swivel or machine guns or battery, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, powerboat, sail boat or night light, and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one (Concluded on page 8.)

Friday-Saturday August 30-31

E. B. RAMSAY IS HEAD OF NEW GRAIN BOARD

Ottawa.—The Canadian Board of Grain Commissioners will be: E. B. Ramsay, chairman, Prof. Duncan A. MacGillivray, Hon. C. M. Hamilton.

This announcement was made here by Hon. James Macdonald, Minister of Trade and Commerce. Recently the three who composed the board, Leslie H. Boyd, K.C., James Robinson and Matthew Snow, resigned after many years' service.

The announcement of their successors has been awaited with great deal of interest, particularly by those in any way connected with the grain trade.

E. B. Ramsay is general manager of the Canadian Wheat Pool with headquarters at Winnipeg, and a former banker. "He is highly respected on the west for his financial and selling ability," says a statement making public his appointment. The statement adds:

"Professor Duncan A. MacGillivray, professor of political economy of the University of Alberta, is an outstanding economist in western Canada, who drafted the economic factors of the Turgeon report and has a comprehensive understanding of western conditions."

"Hon. Charles MacGill Hamilton, Minister of Agriculture for the Province of Saskatchewan, is a practical agriculturist. All three are outstanding business men, familiar with the grain trade and representative of the three prairie provinces, one from Manitoba, one from Saskatchewan, and one from Alberta."

Naval Disarmament

Plans Are Proceeding

Negotiations between London and United States Show Satisfactory Progress

London, England.—Authoritative quarters state that the naval disarmament negotiations between London and Washington were proceeding satisfactorily.

It is predicted that Premier MacDonald will go to the United States in October, after a visit to the meeting of the assembly of the League of Nations.

It is expected that he will then be able to discuss tentative arrangements for a five-power conference. It is presumed that further arrangements will be reached when Premier MacDonald meets Ambassador Dawes at Elgin-Auger at a time when they probably will be present at a luncheon given by that municipality.

Wants Alberta Coal

But Price Prohibitive

Manager Of Winnipeg Hydro Finds Price Too High

Winnipeg, Man.—That the price asked for Alberta coal is prohibitive was forcing him to bring in to Winnipeg, American coal for the city steam heating plant, was the statement made by J. G. Glasco, manager of the Winnipeg Hydro. He declared it appeared likely that the entire coal supply would have to be brought from across the border.

"Canadian dealers are submitting tenders for Alberta coal at \$7.00 a ton, as compared with \$7.20 quoted for the American product," Mr. Glasco said, adding: "the tragedy is that the coal we want is in Alberta."

Find Missing Pilot

C. R. Troup Of Inter-Provincial Airways Was Lost Nine Days

Montreal.—Pilot C. R. Troup, of the Inter-Provincial Airways, who had been missing nine days, was discovered by one of the six rescue planes that had been searching for him, 2,000 miles north of Seven Islands, Que.

He had been forced down by engine trouble. Troup was well and suffered no ill-effects from his experience. He was flown back to Seven Islands.

Poincare Goes Home

Paris.—Former premier Raymond Poincare has been removed from the clinic where he was operated on two weeks ago and taken to his home to await more complete recovery and a second and more serious operation about September 15. His condition was described by his physicians as "highly satisfactory."

W. N. Y. 1799

Pacific Ports Lead In Grain Exports

Taking Trade From U.S. Atlantic Ports, Not Montreal

Vancouver, B.C.—Vancouver smelted Pacific coast ports lead Canada in export of Canadian wheat, according to a study furnished by the Vancouver Merchants' Exchange and computed from official figures compiled by the board of grain commissioners.

Vancouver, New Westminster, Prince Rupert and Victoria shipped a total of 97,000,000 bushels in the 1928-29 season or 20 per cent. of the total Canadian export, while Montreal, Quebec, Halifax and other Atlantic ports combined exports accounted for 92,000,000 bushels of Canadian wheat.

From these figures it is deduced that Vancouver is not cutting in on the trade of Montreal, but is shipping at the expense of United States Atlantic ports, which shipped 67 per cent. of the total in 1928-29 and have since declined to 46 per cent.

The Merchants' Exchange figures do not take into consideration grain other than wheat and shipments of United States wheat through Canadian ports are omitted.

Chinese Leave Under Bond

Return To China For Trial On Opium Smuggling Charge

San Francisco, Cal.—Mr. and Mrs. King Kuo and Sun Poon, former athletes of the Chinese team here, who are under Federal indictment for an alleged attempt to smuggle 200,000 pounds of opium into the United States, sailed for China on the liner "Shimo Maru." They left under bond and with the formal permission of the United States government.

Washington.—Secretary Stimson said that the return of Mr. and Mrs. King Kuo and Sun Poon, formerly connected with the Chinese community at San Francisco, to China, must be the desire of the Chinese government, and that the prisoners had waived trial in the United States on charges of opium smuggling or conspiracy.

"The government has secured assurances, he said, that the three would be prosecuted by the Chinese government."

Advise Return To Bogor

Better For King George Than Sandringham Say Doctors

London, England.—The Daily News says that King George's doctors had advised him to return to the seaside at Bogor for further recuperation instead of going to Sandringham. His Majesty's favorite country estate. The court encouraged by the opinion of the doctors' health since his second operation, had planned to go shortly to Sandringham.

The Daily News added that it was feared the King might be tempted to exceed his strength at Sandringham by indulging in grouse shooting, which is very fond of.

This danger would be avoided if he could be persuaded to remain in London for a short while, and then to Bogor for the next few months. He would stay at Craigwell House, where he was moved from London after his grave illness last winter.

Probing Status Of Women In Quebec

Special Commission Appointed To Study The Question

Quebec, Que.—The provincial cabinet, at a meeting held here, appointed a special commission to study the question of the legal status of women in the province of Quebec. The members of the commission will be Judge C. N. Dorton, Chief Magistrate P. Roy, and Joseph Biron, notary, all of Quebec City, and Victor Morin, notary, of Montreal.

Triple Drowning Accident

Edmonton, Alberta.—Word of a triple drowning tragedy at a picnic at Hanna Beach, on Buffalo Lake, near Red Deer, Alberta, was received at Edmonton. The victims were Mary Horton, 15; Francis Horton, 14; and Edna Payne, 14. The three girls went to their death when they stepped into a deep hole while bathing. The Horton girls were sisters.

The Sails For Home

Quebec, Que.—Sir Eric Geddes, former minister of transport in a British wartime government and now in the Imperial War Commission, sailed, called from Quebec on the "Empress of Australia," following a brief business visit to this country.

British Columbia Fire Situation Is Serious

Pacific Coast Province Shrouded In Fog Of Smoke

Vancouver, B.C.—With the whole of the southern interior of British Columbia shrouded in a pall of smoke from a hundred fires, the fire situation in this province is reported by forestry officials as very critical. All available unemployed men in Nelson and vicinity have been called to fight the outbreaks and an additional man recruited in an effort to cope with the situation. So dense is the smoke at Nelson that the ferry airplane is unable to leave the water on account of the poor visibility.

A serious situation exists at Tunnel, between Grand Forks and Nelson, in the boundary district, where fire fighters are doing their best to subside the fire raging there, without the aid of water. Fire at Westgate, also in the boundary district, is out of control. The Sheep Creek outbreak, on the international boundary, is reported under control.

The forest fire situation on the lower mainland and Vancouver Island remains extremely hazardous. Particularly serious are conditions in the vicinity of Campbell River. Vancouver Island, where fires are menacing large tracts of standing timber.

THOMAS SEEKS OPENINGS HERE FOR UNEMPLOYED

London, Eng.—When Rt. Hon. J. H. Thomas, Lord Privy Seal and unofficial Minister of Employment, reaches Ottawa, he will emphasize to the Canadian Government that some openings for British labor must be created in the Dominion if British capital and enterprise were utilized more fully to develop Canadian industries, according to the Manchester Guardian.

The newspaper declares that Mr. Thomas would like to see the Board of Trade suggestion that British industry might set up manufacturing concerns in Canada, a suggestion that is sometimes referred to as "putting the other leg in the Dominion."

"The Canadian also says that Mr. Thomas would like to see a considerable amount of British capital to be invested in Canadian public works, such as the construction of roads. British labor must be employed. And if the Canadian reply to this is a question as to the fate of the British workers when the roads are completed, Mr. Thomas will answer that in view of the rapid expansion of Canadian industries there would be a reasonable prospect of absorbing such immigrants permanently."

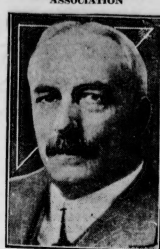

The Guardian, however, thinks there will be no surprise if Mr. Thomas accomplishes less than he hopes.

INDIAN SIGNS FOR SCOUTS

Wm. Tomkins, member of the California Executive of the Boy Scouts' Association, is here shown demonstrating to a boy scout on a board Canadian Pacific steamship "Duchess of York," the Indian sign for "good" while the scout is making the sign for "wolf" which means "scout." Mr. Tomkins has been specially commissioned by Chief Scout Baden-Powell, to instruct boy scouts in the Indian sign language and was photographed on his way to attend the World Scout jamboree held at Bournemouth, England, first two weeks of August. About 300 United States Boy Scouts travelled on the "Duchess of York," and in all some fifty thousand scouts were present from forty countries at the jamboree in honor of the 21st anniversary of the founding of the movement.

HEADS BRITISH MEDICAL ASSOCIATION

Dr. Harvey Smith, native of Winnipeg, who has been formally elected president of the British Medical Association. The Association will meet at Winnipeg next year.

Excellent Wheat Yields Reported In Alberta

European Settlers In Alberta Will Realize Dream Of Wealth

Winnipeg.—A number of European immigrants who came to Canada with the dream of wealth, will have their dreams fulfilled, according to N. M. Ostrowsky, of the Dominion Colonization Company, at Edmonton, who declared here that excellent wheat yields are reported in different parts of Alberta where the immigrants have taken farms.

At Federal, 20 miles north of Edmonton, farmers are reaping from 35 to 50 bushels per acre off new broken land. Roycroft, in the Peace River country, where Mr. Ostrowsky has a 400 acre farm, the yield is 40 bushels. Leduc, Alberta, reports that the yield in that district will be from 40 to 50 bushels per acre.

Minister Of Railways Steadily Recovering

Hon. C. A. Dunning Will Return To Ottawa At End Of August

Ottawa.—Hon. C. A. Dunning, Minister of Railways and Canals, who is now resting at his farm in Saskatchewan, west of Yorkton, is expected to return to the capital by the end of the month. He is steadily recovering from the effects of the operation he underwent at the end of the parliamentary session, and with the complete cessation from work he is now enjoying in the west expects to be restored to complete health and vigor in the near future.

Credit For Bank Of England

New York.—The Bank of England, its store of gold drained by French purchases to the lowest point of the year, has made an arrangement whereby a credit of about \$250,000,000 can be established here at a few hours' notice.

No Change Made

Normal School Course In Saskatchewan Not Lengthened

Regina.—No change has been made in the length of the Normal school course in Saskatchewan according to an official statement issued by the department of education.

From inquiries that are being received at the department, it appears that the impression has got abroad that the normal school course has been lengthened to two years. This is not the case.

The seasons opening on September 4, will continue until June 6, 1930, and students who complete the course satisfactorily will receive interim, second or first class certificates, according to their academic standing.

Building Bigger Liner

Vessel Replacing Oceanic Will Challenge Speed Of Bremen

London, England.—A Belfast dispatch to the Daily News says that the keel of the 60,000 ton White Star steamship "Oceanic," to have been replaced by a keel of the world, has been completely demolished and plans are being prepared for a new vessel to take up the speed challenge of the new German liner "Bremen."

The keel was laid last October and was nearly completed when work was ordered stopped on July 23. It was understood that a new ship, to be even greater in length than the "Oceanic," had been originally proposed for the "Oceanic" was to be built.

Japanese Officers Killed

Were Making Preparations For Reception Of Great Zeppelin

Tokyo, Japan.—Six high army officers including Major General Ogawa, of the Imperial General staff, were killed when a military airplane crashed at Kaumigawa, while making preparations for the world flight of the dirigible "Raid" on the seventh occasion of the plane, also an army officer, is dying. The plane was a huge bomber.

U. S. CRITICISM OF REPARATIONS PUZZLES BRITAIN

London, Eng.—American newspaper criticism of Rt. Hon. Philip Snowden's attitude at the League reparations conference in connection with Britain's heavy financial arrears has surprised as much as his mysterious withdrawal from public life, newspapers and politicians.

They find it difficult to reconcile the United States stand regarding war debts, which is a very firm, to the criticism of the British Chancellor of the Exchequer and they suspect there must be a hidden motive.

It is suggested in some quarters that the real reason is to be found in the recent negotiations between Montagu Norman, Governor of the Bank of England, and American bankers, which was founded upon the presumed acceptance by the British Government of the entire Young plan. It is also suggested that Mr. Snowden is aware of this and that therefore his attitude is more adamant than ever.

Hints in American newspapers that Mr. Snowden's stand may make the Anglo-American negotiations on naval disarmament more difficult, have frankly puzzled British officials and the public, who are so strongly behind the chancellor that newspaper offices are being deluged with letters from readers of all political parties praising his attitude.

There is no doubt that if the new Labor Government went to the country tomorrow they would be returned by an overwhelming majority, and the only regret of some shrewd Labor politicians is that the Government is unable to take advantage of a situation that it is not likely to arise again during the life of Ramsay MacDonald's cabinet. Even the most die-hard Tories are saying that Mr. Baldwin had adopted an attitude similar to Mr. Snowden's when negotiating the war debt settlement with the United States.

Not since the great Disraeli went to the congress at Vienna after the Russo-Turkish war and returned with "peace and honor" has there been such a spontaneous outburst of enthusiasm for a British statesman. This is making it all the more difficult for the British public to understand the American attitude, as revealed by the American press.

BRITISH EMPIRE MOURNS DEATH OF GEN. LORD HORNE

Edinburgh, Scotland.—Great Britain and the Empire is mourning the loss of Gen. Lord Horne, commander of the first army from 1916, and for his military methods in the battles of the Somme. Lord Horne died suddenly while shooting on the moors of his estate at Strathclyde.

The despatches did not give the cause of his death. He was 68 years old and had held many high commands in the British Army where he was celebrated especially as an artillery commander.

The Canadian corps, as part of the first army, came under Lord Horne in the closing drive of 1918. Gen. Sir Arthur Currie, commander of the Canadian corps, was the recipient of an historic message from the army commander after the great Canadian efforts at Cambrai. Lord Horne then expressed his high appreciation of the determined fighting by the Canadians in forcing the crossing of the canal and capturing Bourlon Wood and the high ground north and northwest of Cambrai, when troops of twelve enemy divisions were engaged in an attempt to stem the advance of the four Canadian divisions.

In November, of 1915, General Horne was sent to Egypt to replace Lord Gallipoli and was afterwards sent on to Egypt to report on the defenses of the Suez Canal. He was appointed to command the 15th corps in Egypt in January, 1916, and in April of that year his corps was transferred to the Italian front.

A sum of \$150,000 was voted to Lord Horne by the British Government as a tribute from the nation after the Armistice.

Charged With Arson

Regina Youth Says He Set Fire To Parliament Buildings

Regina, Sask.—Donald Johnston, 22 years old, who confessed to having set fire to the doors of the parliament buildings, was charged with the burning of the parliament buildings was to start activities of the organization. The man who held the \$11,000, however, had disappeared together with the money. Magistrate Hefferman refused to allow bail, stating that he thought the state of the young man's mind should be looked into.

Granted Pilot's Certificate

Miss MacBrien Is Sixth Licensed Woman Pilot In Canada

Ottawa.—Miss Julia MacBrien, daughter of Major J. H. MacBrien, president of the Aviation League of Canada and former chief of general staff in the Department of National Defence, was granted a private air pilot's certificate.

Miss MacBrien is the second member of her family to secure a private pilot's license. Her father is at present on an aerial tour of the prairie provinces. She is the sixth licensed woman pilot in Canada, and is 19 years of age.

Takes Post In Palestine

Montreal Woman Journalist Accepts Position On English Newspaper

Montreal.—The post of assistant editor of the Palestine Daily Bulletin, of Jerusalem, the only English newspaper published in Palestine, has been accepted by Miss Anne S. Lermer, young Montreal newspaper woman. Miss Lermer sails at the end of August for England, from where she will proceed to Jerusalem to take up her new position.

Liberals Wins Seat

Prince Albert, Sask.—Forest fire losses have been so great this year are greater than during any previous year in the history of the Dominion Forestry Service suppressing operations in this province.

Timber Loss Heavy

Prince Albert, Sask.—Forest fire losses have been so great this year are greater than during any previous year in the history of the Dominion Forestry Service suppressing operations in this province.

Preserving One's Health

Periodic Medical Examinations Offer Safe Measure To Take To Guard Against Disease

(By Dr. Gordon Davis, General Secretary, Canadian Social Hygiene Council.)

I had a very good friend—a leading professional man, in middle life. "I had"—what a tragedy!—one of the two words can suggest, as they do in the present instance. By hard work my friend had earned a position of the highest standing. He was a leading citizen, a gentleman. He was at the top of his profession. In terms of life generally, he had reached that long, calm plateau which some fortunate men attain after the climb and the storms of youth are over. He seemed to be in the best of health; Canada had reason to expect of him long years of mature work, and thought, and guidance.

And then one evening he dropped dead. What a shock to his family and friends. What a loss to the community in which he lived—that this individual of ripened, mature judgment, of great force of character and personality, this leader, should have been stricken down just when the star of his destiny seemed to be shining brightest.

And the greater tragedy was this: that his death was unnecessary. There was no need for him to have died for another twenty or thirty years.

There are thousands of people like that, every day. For scores of years, people have been saying "an ounce of prevention is worth a pound of cure." If only those who say that so glibly could appreciate its profound truth. If only they would take the trouble to apply it to their own health and well-being.

My friend died suddenly of a heart condition that was entirely unsuspected. He had never experienced any symptoms, so had no reason to believe that anything was the matter with him. To most people, that fact is sufficient to indicate that the death was absolutely unpreventable, but that is not so.

Medical science has progressed far beyond the knowledge of the layman. The X-ray sees things that are hidden to the naked eye. And if he had been in the habit of subjecting himself to a thorough physical examination every year, or every six months, that heart condition or his cause might have been detected long ago. He would have been warned by his doctor, could have dealt with conditions which neglected result in heart disease, or were the heart disease already in existence could have no regulated his life as to impose the least possible strain upon his heart.

There is no possibility of error here; it is recognized by leading doctors the world over, that the person who has his system examined is "overhauled" regularly just as a sensible motorist has his car overhauled regularly, has a far better chance of longer life than one who does not.

No one doubts such a reasonable claim. It isn't public opinion that has to be overcome; it is public indifference. The average man is too busy trying to add a thousand dollars to his income to bother about adding ten years to his life.

A very large proportion of illnesses, if dealt with in their incipient stages, will not become serious. During those incipient stages, the symptoms are so slight as to be scarcely noticed by a layman. In the later exterior symptoms may be present, whatever. Furthermore, there are many physical conditions that are forerunners of illness—conditions that may lead up to illness if not checked. It is the little things that have to be watched—the inconsiderable ailments that grow into real ones of disease. Here the importance of regular physical examination looms

large. High blood pressure, overweight, are examples. Or a man's habits may need to be corrected. Cancer, syphilis, tuberculosis are all diseases that it is supremely important to combat early, and whose earliest symptoms are not always manifest to the patient.

In a pamphlet issued by physicians by the Dominion Department of Health, and compiled by the Canadian Medical Association, the following appears: "The average man habitually accepts his variations from the normal as a matter of course, that he should be resigned. The Army experience demonstrates clearly that a very high percentage of supposedly fit and active men among rich and poor alike, have some physical impairment which in many cases, is due to preventable causes. It has been shown further that improvements may result upon the correction of such defects and by the establishment of proper hygienic and dietetic habits."

Periodic health examinations afford the only systematic opportunity—

(a) To observe the development of the individual.

(b) To detect the earliest signs of change from the normal and of impending disease.

(c) To observe the effects of a hygienic daily regime.

(d) To note abnormal conditions arising from neglect of the laws of health.

(e) To recognize the benefit of following advice given to correct these abnormal conditions.

(f) To detect the early signs of disease, and the results of their persistence.

(g) To accumulate facts regarding the symptoms of disease and treatment.

(h) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(i) To study the importance of hygienic and dietetic treatment in general.

From the foregoing, some idea of the advantages of periodic physical examinations, both to the individual, and to society, may be gathered. It is up to those who desire to partake of those advantages to govern themselves accordingly.

Wood Ashes For Potash

An All-Round Fertilizer For Supplying Mineral Elements Required By Crops

The use of wood ashes as a fertilizer is not new, and their use for clover, grapes, fruit trees and leafy crops generally is recognized by the world.

"Potash in Agriculture," is the subject of a pamphlet written by Dr. F. L. Shutt, Dominion Chemist, which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

In this Dr. Shutt says that wood ashes contain also 2 per cent. phosphoric acid, and from 20 to 30 per cent. carbonate of lime, enhancing their fertilizing value. In making them, in a sense, an all-round fertilizer for supplying the mineral elements required by crops. And, further, they contain a certain amount detrimental to the thrift of most farm crops. Muriate and sulphate of potash are of no value for neutralizing acidity.

Naturally, genuine wood ashes are somewhat variable in composition, depending partly on the nature of the wood producing them and partly on the care with which they have been collected and stored. With adulteration of a light character has been occasionally detected in commercial samples, addition of sand and other inert matter and leaching being the most common forms of adulteration.

There is a general belief that ashes from hard woods, as a class, are richer in potash than those from soft woods, but our analysis scarcely confirm this impression. As might be expected, woods differ very considerably in their potash content and the ashes of twigs and boughs are much richer than those of trunks, while Pine and other soft woods as a rule contain less ash than the hard woods, and are much lighter in character, and it is in this latter quality or property, we think, that has given rise to the common belief that soft woods are poorer than those from hard woods.

The pamphlet also deals with commercial sources of potash, manure, seaweed and the uses of potash.

Time For Repairs

The Queen Elizabeth clock at Castle Rushen, Douglas, Isle of Man, which has kept time for more than 300 years, is being repaired. It was presented by the Virgin Queen in 1597, and has only one "hand" and two "weights." The hour is shown on a ball presented by the Earl of Derby in 1722.

Living Barometers

Animals Are Pretty Reliable As Forebearers Of Weather

Country folk do not seem to rely on newspapers and wireless reports to tell them what kind of weather they may expect, says a writer in *Animals*. The clouds, the birds, the sun, the pigs and a host of other things provide their weather forecasts.

When they see the moon surrounded by a ring or halo they know that rain is not far away, and the larger the ring the nearer the storm. But in bad weather a ring round the sun is welcomed, because an improvement is probable.

The stars, too, tell their story. If they twinkle more than usual at night high winds and unsettled conditions are expected.

Signs of red and gold sunset are received well, for fine weather will follow, but any pretty sunset effects in the clouds at sunset are unfavorable signs.

Country folks, however, do not rely entirely on the way for their weather forecasts. Animals provide excellent barometers. If cows cease to yield their normal supply of milk and stormy weather is ahead, and if they seem restless they know that rough winds are to be expected, and that the cow-houses are strengthened in anticipation.

Pigs usually so quiet, become agitated when a spell of good weather is about to end. Pigs also have a curious custom of carrying mounds of straw into their sleeping quarters, before a gale. Sheep in fine weather will scatter over a wide area, but if a change is approaching they will huddle together.

Careful weather watchers have noticed that spiders work strenuously to strengthen their webs before rain winds.

Frown On Stunt Flying

Convention Of Western Aviation Clubs Passes Resolution

Resolutions opposing stunt flying and the carrying of passengers by pilots with less than 25 hours' solo flying, were passed by delegates to the convention of Western Aviation clubs, at a meeting in Regina, It was also suggested that club aerobatics be confined to spins, side slips and stalls.

Major-General Macbrien, president of the Aviation League of Canada, and delegate from Winnipeg, Moose Jaw, Port William, Regina, Calgary and Saskatchewan were present.

The meeting discussed the proposition of ways and means of airframe supervision and the possibility of disciplinary action against hazardous flying. It was also suggested that club circuit commercial flying so as not to conflict with commercial companies.

No action was taken on the resolution put forward that the members of the new organization be confined to British subjects.

Ancient Brooch Found

Workmen quarrying at lime kilns at Crenaghoe, Ireland, recently found an ancient Irish brooch in a crevice of soft rock two feet below the surface of the ground. Dating from the seventh century, it is of bronze, and consists of the ring and a pin, the back of the pin being coated with enamel of a light green color, and the front and the pin of dark green enamel.

So Well Educated

Mrs. Newbridge had just arrived from a tour of Europe, and her long-suffering acquaintances had no opportunity to forget the fact.

"And Paris?" she gushed. "Paris is just wonderful. The people are all so well-educated—not at all like they are in this crude country, my dear! Why, even the street cleaners can talk French!"

18 GOLF CHAMPION

No Doubt a Brilliant Hit Can Also Be a Tyrant

A well-known hero of the films at Hollywood had his telephone number changed because enthusiasts persisted in calling him at all hours just to hear the sound of his voice. Doubtless his responses were not always here-like, but his protests proved as weather forecasts.

The average man will probably never experience the thrill of seeing his name emblazoned on a motion-picture screen, but if he is honest he will confess a sense of brotherhood to the Hollywood celebrity. What busy executive has not been riveted to the phone by some effusive acquaintance who finds difficulty in bringing his remarks to a complete stop? What master of the household, on a Sunday afternoon, has not been brusquely dispatched by any one of the dozen youthful pals to call Robert to the waiting refrigerator? What awkward man who has not been soundly reprimanded by an operator to "Excuse it, please," when he has finally responded to a telephonic barrage with a meek "Hello?"

The telephone is at once friend and tyrant when vacation days come, and the long road beckons, and the wind cranes in the high-bells, and the typical "Hello, how are you?" will find reason in the kindly oblivion of wood and stream, where there are no alarm clocks, no street cars, no busy wages, no time to be jangling bells to call him back to a work reluctant to let him go. Small wonder the average human being feels the expression of a heart-felt "good-by" to the telephone, instead of the conventional greeting of "Hello, Hello!" It is good, occasionally, to give one's ears a rest.

Canning Vegetables

Necessary To Carry On Process As Rapidly As Possible To Ensure Success

The following general rules for the canning of vegetables by the cold-water method are laid down in Bulletin No. 77, entitled "Preserving Fruits and Vegetables in the Home." Select freshly gathered vegetables. Avoid using very dirty vegetables. Can, if possible, the day they are picked.

Do not use wilted greens for canning. If only slightly wilted, let stand in cold water until they become crisp again.

Wash thoroughly with a brush such vegetables as beets, carrots, etc. Can only a small quantity of vegetables at a time, especially in hot weather. It is necessary to carry on the various steps in the canning process as rapidly as possible to prevent loss of flavour, and the development of flat sour, which is very injurious to health.

Grade as to size, shape and degree of tenderness and colour. Where vegetables are sliced or cubed, the pieces should be of uniform size and shape. All vegetables should be blanched or scalded as described on page 9. This must be followed by the cold-water method.

It is advisable to blanch such vegetables as asparagus, Swiss chard, beet greens in steam rather than in boiling water, as there is less loss of valuable mineral matter. Pack carefully into tested, hot, sterilized jars, and ½ teaspoonful of salt to each quart jar. Fill to overflowing with boiling water. Rubbers and caps are placed in position and the same method as given for fruit is applied.

Canning, pickling, preserving and the hundred and one things that can be done with fruits and vegetables are included in this bulletin which will be sent on application to the Publications Branch, Department of Agriculture, Ottawa.

Little Dorrit Church In Peril

Little Dorrit's Church St. George's the Martyr, Southwark—immortalized by Dickens in his description of the marriage of Little Dorrit, is in peril. Repairs costing \$25,000 are badly needed, and only \$7,500 is available for the purpose. The vicar has made an appeal for funds, but so far the response has been poor. Though he has written 700 personal requests for aid, less than \$100 has been raised.

"I have already asked you five times for the money you owe me," "But how many times did I have to ask before you lent it to me."

Long may it waver—the permanent.

Telephone Often a Nuisance

No Doubt a Brilliant Hit Can Also Be a Tyrant

A well-known hero of the films at Hollywood had his telephone number changed because enthusiasts persisted in calling him at all hours just to hear the sound of his voice. Doubtless his responses were not always here-like, but his protests proved as weather forecasts.

The average man will probably never experience the thrill of seeing his name emblazoned on a motion-picture screen, but if he is honest he will confess a sense of brotherhood to the Hollywood celebrity. What busy executive has not been riveted to the phone by some effusive acquaintance who finds difficulty in bringing his remarks to a complete stop? What master of the household, on a Sunday afternoon, has not been brusquely dispatched by any one of the dozen youthful pals to call Robert to the waiting refrigerator? What awkward man who has not been soundly reprimanded by an operator to "Excuse it, please," when he has finally responded to a telephonic barrage with a meek "Hello?"

The telephone is at once friend and tyrant when vacation days come, and the long road beckons, and the wind cranes in the high-bells, and the typical "Hello, how are you?" will find reason in the kindly oblivion of wood and stream, where there are no alarm clocks, no street cars, no busy wages, no time to be jangling bells to call him back to a work reluctant to let him go. Small wonder the average human being feels the expression of a heart-felt "good-by" to the telephone, instead of the conventional greeting of "Hello, Hello!" It is good, occasionally, to give one's ears a rest.

Was Friend Of King Edward

Chief Personal Attendant Of King Edward Dies In London Hospital

Edward Miedinger, for 33 years chief personal attendant of King Edward, died recently in a London hospital where he had been taken after being found at his Leyton residence with throat wounds. "The wounds were apparently self-inflicted," Miedinger lost his wife some years ago, and his daughter was killed in an air raid during the war, but he always appeared cheerful, at least until recently. It is understood he was in receipt of a pension from the royal family.

Miedinger's rooms were filled with mementos of his long service with the late King Edward VII. As Prince of Wales, Edward VII, was always regarded as the best dressed man in the kingdom, but Miedinger was never very far behind his royal master in outward appearance. Right to the last he maintained the most correct style of clothing, his manners too, to all and sundry, were entirely in keeping.

Population Of Dominion

The total population of Canada as at June 1, 1929, according to an estimate of the Canadian Government Bureau of Statistics, is 9,796,000, an increase of 138,500 over the estimate on June 1, 1928, since the last official decennial census was taken, in 1921. Canada's population has increased over 1,600,000. The next census will be taken in 1931.

Canada Air Mail Service

An average of about 1,400 letters a day is being carried over the newly-established air mail service between Montreal and Windsor, according to officials of the Post Office Department, while about half that number is carried daily between Toronto and Buffalo.

A penny in the slot gives one the right of weigh.

Migratory Birds Convention Act

Summary Of Game Laws For Alberta and Saskatchewan

A summary of the Migratory Birds Convention Act is given below. The law was passed under the Treaty with the United States. Any enquiries concerning this law may be addressed to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

The open season in Saskatchewan, north of Clearwater and Athabasca Rivers—For Ducks, and Geese and Coots, September 15 to December 31; Wilson's or Jacksnipe, September 15 to December 31.

The open season in Alberta, north of the Clearwater and Athabasca Rivers—For Ducks, and Geese and Coots, September 15 to December 31; Wilson's or Jacksnipe, September 15 to December 31.

There is a closed season throughout the year on the following non-game birds in Saskatchewan and Alberta: Canada warblers, wood ducks, golden plovers, curlew, willets, godwits, upland plovers, blackbellied and golden plover, greater and lesser yellow-legs, avocets, dowitchers, knots, oyster-catchers, phalaropes, stilts, surf-scoters, turnstones, and all the shore birds not provided with an open season in Alberta or Saskatchewan.

There is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bitterns, grebes, greynoses, golden plovers, goldeneyes, gulls, guillemots, jaegers, jaegers, loons, murrelets, puffins, shearwaters and terns, and there is a closed season throughout the year on the following non-game birds in Alberta, Saskatchewan and British Columbia: Auks, aukslets, bit

Community Beautiful Association Offers Prizes For Best Efforts To Improve Farm Cottages

As part of a Dominion wide plan to farm owners and others, the benefits accruing from the brightening up of the surrounding of the farm home and surroundings, a novel demonstration is being arranged by the Canadian Home and Community Beautiful Association, according to Lee R. Judson, managing director of the Association, Montreal.

The magical transformation of a bare farm cottage and its immediate surroundings into a thing of beauty, in a demonstration lasting only two hours, is the novel event planned to take place before the end of this month, and to which the Rt. Hon. J. T. Thomas, Lord Privy Seal and Minister of Agriculture in the British Cabinet, has been invited by the Association.

The scene will be eight miles from London, Ontario, at the location of one of a hundred and fifty cottages built throughout Canada by the Department of Colonization and Development of the Canadian Pacific Railway, under an agreement with the Overseas Settlement Committee of the British Government. The Chamber of Commerce is collaborating with the Canadian Home and Community Beautiful Association in the latter's arrangements to dramatize, as Mr. Judson calls it, the "Canadian Clean Up, Fix It, and Keep It Up" idea of the farm.

At part of the demonstration the Rt. Hon. Mr. Thomas will be asked to apply part of the first coat of paint to the cottage exterior from a specially spraying equipment. Simultaneously a crew of paint hangers will be busy on the inside. Shows will be placed near the entrance to the cottage. Window boxes of a type, which a farmer can easily make, will be adjusted, and the whole effect will be to work a remarkable transformation before the eyes of the official committee and spectators, in two hours or less.

"Demonstrations such as the one arranged for," said Mr. Judson, in an interview, "are not entirely new, but this is the unique in that the sponsors will compile newspaper and moving picture representatives, provincial, agriculture, trade, civic, and other organizations, and the Canadian Pacific Railway, will be prominent in the important mission of illustrating the idea of the brightening up of the farm and the consequent enhancement of the farm morale. With this as a nucleus the Canadian Home and Community Beautiful Association hopes to influence more owners of farms throughout the Dominion to make their homes more pleasant, to provide more colorful surroundings and better housing methods, living conditions on the farm will not only be made more attractive to Britons who come to the Dominion to take up farming, but the principles advocated by the Association will help the farm owner to cut down that enormous depreciation which follows when buildings are permitted to deteriorate.

There are thousands of home owners, not only on farms, but in towns and cities of Canada, who would and should the greatest benefits in the modernizing of their buildings, whether it be through merely freshening up of an old place with paint or by means of alterations. Many people think that such improvements are not for them, that modernizing is too complicated or costs a great deal. And so it is the purpose of the Canadian Home and Community Beautiful Association, working with the Chambers of Commerce and Improvement Associations over all the Dominion to demonstrate how the enormous results can be obtained, and then advise the farm owner

regarding the availability of necessary material and equipment to do the work, costs and other details. This in a way may be looked upon as simply augmenting the fine work which governmental and other agencies have done, but we are in a position to co-ordinate many factors with the one end in view.

"It was not so long ago," concluded Mr. Judson, "that you could only get a few dollars worth of material and equipment by modern 'Save the Surface' methods. All references to beautifying alarmed him because it suggested extravagance. This is no longer true because through such educational movements as our own, it is realized that the brightening up and proper maintenance of the farm home and buildings increases the property value, and today with so many visitors from other countries travelling through the Dominion, the effect of more attention bestowed on farm interest creates a very desirable impression."

It is understood that the Canadian Home and Community Beautiful Association will offer several prizes in the near future for the best efforts at improvement made by the occupants of farm cottages in various parts of the Dominion.

Strawberries For England

First Shipment Of Treated Fruit Sent From Victoria

A trial shipment to England of five barrels of strawberries, which have been given the sulphur dioxide treatment, has been made by growers at Gordon Head, Vancouver Island. At first local customs officials objected to giving clearance to the berries on the ground that the use of chemicals would bar their entry as produce. It was, however, explained that this treatment was largely used in the Old Country as a temporary way of preserving berries until they were jammed. The chemical being drawn off and the berries restored to their natural appearance in the jamming process. Clearance was then given, and the matter had been referred to Ottawa and shipped to London from Victoria. Each barrel contained approximately 300 lbs. of berries.

"Demonstrations such as the one arranged for," said Mr. Judson, in an interview, "are not entirely new, but this is the unique in that the sponsors will compile newspaper and moving picture representatives, provincial, agriculture, trade, civic, and other organizations, and the Canadian Pacific Railway, will be prominent in the important mission of illustrating the idea of the brightening up of the farm and the consequent enhancement of the farm morale. With this as a nucleus the Canadian Home and Community Beautiful Association hopes to influence more owners of farms throughout the Dominion to make their homes more pleasant, to provide more colorful surroundings and better housing methods, living conditions on the farm will not only be made more attractive to Britons who come to the Dominion to take up farming, but the principles advocated by the Association will help the farm owner to cut down that enormous depreciation which follows when buildings are permitted to deteriorate.

There are thousands of home owners, not only on farms, but in towns and cities of Canada, who would and should the greatest benefits in the modernizing of their buildings, whether it be through merely freshening up of an old place with paint or by means of alterations. Many people think that such improvements are not for them, that modernizing is too complicated or costs a great deal. And so it is the purpose of the Canadian Home and Community Beautiful Association, working with the Chambers of Commerce and Improvement Associations over all the Dominion to demonstrate how the enormous results can be obtained, and then advise the farm owner

regarding the availability of necessary material and equipment to do the work, costs and other details. This in a way may be looked upon as simply augmenting the fine work which governmental and other agencies have done, but we are in a position to co-ordinate many factors with the one end in view.

Monopolizes Jap Market

Canadian Wheat Has Supplanted All Others Says Flour King

The importance of the Japanese market to Canada may be illustrated by an interview in the "Vancouver Province" with Tsuchiro Shoda, the flour king of Japan, who is president of the Nishin Flour Mills Company and operates twelve mills in different parts of that country with a capacity of 20,000 barrels a day. He is reported to have said that his company alone imports an average of 250,000 tons of Canadian wheat annually, which would be equal to about 8,500,000 bushels. Our total exports of wheat to Japan in the calendar year 1928, were 16,977,261 bushels valued at \$16,914,884, and that Mr. Shoda is apparently the customer for one-half of it. In addition, we shipped to Japan that year 96,552 barrels of wheat flour, valued at \$491,109, which, no doubt, came into competition with his product. Sixteen years ago, when he made his first visit to this continent, Japan depended on the northwestern United States for its wheat, and Vancouver was unknown as a grain-exporting port. Today conditions are reversed and Canadian wheat monopolizes the Japanese market. Mr. Shoda says that price and quality are the factors which enabled Canadian wheat to supplant American wheat there. Markets which might be a serious rival were not for uncertainty of deliveries, lack of handling facilities and absence of organized grading.

A Miniature Cow

World's Smallest In Quite Perfect and Weighs 40 Pounds

What is supposed to be the world's smallest cow, "Daisy," was recently on exhibition at the Royal Show, South Africa. The little mite, who was born from ordinary parents in far-away Buenos Ayres (South America), is 5½ years old, stands only a few inches high and weighs in the vicinity of about 40 pounds. She is absolutely perfect in every detail, she is insured with Lloyds for £25,000, and her carcass will be presented to the British Museum after death.

Enlarged Grain Elevator

Building At Vulcan Brings Capacity Up To 90,000 Bushels

The town of Vulcan, in southern Alberta, which was made famous by itself by extensive shipments of grain, is having one of its nine elevators enlarged. The new building will increase the capacity by some 30,000 bushels, making the total 90,000 bushels. The grain handling facilities will be improved to increase speed and capacity, and electric equipment will be installed to furnish power.

Klinger: "Why did you paint your house pink?"

"Stinger." To show it's in good condition.

A profile photograph is merely a shadow.

There are thousands of home owners, not only on farms, but in towns and cities of Canada, who would and should the greatest benefits in the modernizing of their buildings, whether it be through merely freshening up of an old place with paint or by means of alterations. Many people think that such improvements are not for them, that modernizing is too complicated or costs a great deal. And so it is the purpose of the Canadian Home and Community Beautiful Association, working with the Chambers of Commerce and Improvement Associations over all the Dominion to demonstrate how the enormous results can be obtained, and then advise the farm owner

Won Rose Trophy

Standardization Of Hogs Necessary Step To Development Of Bacon

The more the producer of bacon knows about hogs, and the requirements of the market to which he is shipping, the greater will be the satisfaction and the profit derived from the business.

The standardization of hogs was a necessary and logical step in the further development of the bacon business, but hogs cannot be bred and grown to a standard type unless the producer has a thorough knowledge of the requirements of the standard.

For the reason a handbook on the "Bacon Hog and Hog Grading" was published by the Federal Department of Agriculture, and quite recently a revised edition of this pamphlet has been printed.

The reasons for producing a bacon hog are outlined in this pamphlet, and also a description of the bacon hog, the breeds of hogs with illustrations, the official hog grades and grading regulations, and the necessity for grading. In fact, all the information needed by the producer in order to make a good hog, and the requirements no matter how discriminating they may be.

All breeders of hogs should secure this pamphlet from the Publication Branch, Department of Agriculture, Ottawa, and if there is any further information desired the hog grader at the stock yards, the live stock promoters, or the Dominion Live Stock Branch, Ottawa, will be glad to answer enquiries.

Sheep For Manitoba Farms

Movement Is Started To Build Up Winnipeg Flocks In The Province

A movement to place sheep on Manitoba farms is now under way as a good start under distinguished patronage. The Manitoba Livestock Credit Company Limited, (which is not a co-operative concern in the ordinary sense), proposes to distribute 7,000 Rambouillet ewes and 3,000 cross-breeds this season, as a start, towards the building up of numerous flocks in the province. Sheep will be sold only to farmers whose applications are approved by a committee formed for that purpose.

Impressed With Mining Development

Back from his annual tour of inspection of the West, Grant Hall, senior vice-president of the Canadian Pacific Railway, expressed himself as greatly impressed with the development of mining in the north and west of Canada, in which Consolidated Smelters is taking a leading part.

The male has one advantage. When the heat becomes unbearable, he has something to take off.

In Japan automobiles have to be illuminated inside as well as outside at sunset.

Believes Purchasing Power Of Western Canada Farmers Will Be Unimpaired By Light Crop

The Bacon Hog and Grading Standardization Of Hogs Necessary Step To Development Of Bacon

How To Maintain Poultry Production

One Of Approved Methods Is Feeding Wet Mash

Now from one of the main principles of the poultryman is to maintain production, and one of the approved methods of doing so is to feed wet mash. This may be the reason why the mash man is so commonly associated with milk or a special mash prepared with one-half of its weight made of butter milk. About three pounds of this mash is fed to each 100 hens.

While we sleep the war and fear in our bodies is made good; without it we die. According to a scientist who has just returned from a recent, the slumbering sleep wakes up between thirty and forty times a night, without remembering it so that no one sleeps just lying awake, when they sleep more peacefully than men.

This question of slumber is one of the most baffling which science has to solve. No one has yet discovered why we fall asleep. Some change must occur in our body, just as a motor-engine will only stop when you switch off or something goes wrong.

Household Insects

Valuable Booklet Issued By Department Of Agriculture, At Ottawa

The latest bulletin of the press prepared by the Federal Department of Agriculture is "Household Insects and Their Control."

It deals with two-winged flies, body parasites, wasps, insects affecting foodstuffs, clothing, carpets, furniture, tobacco, books, seeds, and in fact anything that creeps, crawls or flies that may adversely affect anything within the four walls of the home.

The publication is well illustrated and if you find entomological specimens in the home you do not recognize, a comparison with the illustrations will quickly place the insect, and the remedy for it will be found.

Every home should have a copy of this bulletin which will be sent free on receipt of a card by the Publications Branch, Department of Agriculture, Ottawa.

Grain Elevator Merger

A total of 339 country elevators with a capacity of 7,250,000 bushels are now controlled by the New Federal Grain Limited in the merger of Stewart Terminals, Consolidated Elevator, McLaughlin Elevator, Union Grain, Northwestern Elevator, Topper Grain, and Brooks Elevator. J. C. Gage will be president, and A. E. Sellers vice-president.

Misses: "Mary, has the druggist sent the sleeping powder, yet?"

Maid: "No, ma'am."

Misses: "Then ring him up and ask him if he expects me to keep awake all night waiting for it."

That the purchasing power of the farmers of Western Canada will be at least as great after the present crop is harvested as it has been during the past year, is the considered opinion of C. W. Peterson, of Calgary. Mr. Peterson is well known in Eastern Canada as an expert authority of Western Canadian conditions and his analysis of the situation as given below of importance to the business interests of the country.

Mr. Peterson says: "Estimating yields in seasons such as this, when the contrast between good and poor farming is so enormous, is more guess-work. In Southern Alberta, excellent winter wheat yields and the effect of irrigation development are important factors. It is, however, absolutely safe to assume that results will easily exceed the lowest average yield for the past 26 years of 11 bushels per acre, which would total 1929 of 1929."

A comparison of probable yield with last year is instructive.

The 1928 prairie wheat crop averaged 21.4 bushels per acre. The average price realized did not exceed 98 cents per bushel at Port Arthur. The smaller crop of 1929 of eleven bushels average in 1929 of No. 2 Northern, it will at present prices net the farmer \$5.64. His average acre receipts for 1929, were \$18.27, from which deduct cost of the harvesting and hauling of the wheat, at 10 cents per bushel, or \$1.10, leaving 17.17 cents per bushel, or \$1.66, making net price realized per acre \$16.60, as compared with \$16.40 for the smaller crop of 1928 of higher quality, higher price and smaller handling cost. From a standpoint of farming purchasing power, it seems about as good as it is long, at the very lowest estimate."

The Mystery Of Sleep

One Of Puzzling Questions Science Is Unable To Solve

Human beings are said by a physiologist to be divided into two classes, those who say they sleep like pigs, and those who never get a wink, and the latter group is to tell you about it. Actually both are wrong. Those who complain that they spend night after night just lying awake, prove they are ruminating by the mere fact that they are alive to tell the tale.

While we sleep the war and fear in our bodies is made good; without it we die. According to a scientist who has just returned from a recent, the slumbering sleep wakes up between thirty and forty times a night, without remembering it so that no one sleeps just lying awake, when they sleep more peacefully than men.

This question of slumber is one of the most baffling which science has to solve. No one has yet discovered why we fall asleep. Some change must occur in our body, just as a motor-engine will only stop when you switch off or something goes wrong.

The Singing Fool

By HUBERT DAIL
Copyright, 1927, Warner Bros. Pictures, Inc.

Marcus, the famous Broadway producer, visits Blackie Joe's New York night club, where he hears Al Stone, Blackie's singing waiter, render a love ballad of his own composition. Marcus offers to buy the song at an exorbitant price, but the producer will sing the song in one of the Marcus reviews. Marcus agreed. But then he makes up to him. That night he goes with two persons, Al and Molly, to the club. He is so deeply in love with Al that he quickly comes to his senses.

CHAPTER IX.
Time heals the sharpest wounds, say the philosophers. Perhaps, but the memory of the wounds may last a long, long time. Fortunately is the man or girl who has the strength to blot these memories from becoming bitter.

Grace Farrell, the cigarette girl at Blackie Joe's, was such a person. Al Stone and Molly Walton had met and become headliners on Broadway. As the weeks lengthened into months Grace heard reports of their achievements and saw their pictures in the papers. Al had become one of the outstanding song-writers of Tin-Pan-Alley; his melodious scores featured all the Marcus reviews. His ballads and comic numbers had made him famous throughout America. Molly, true to her prediction, had become a headliner in the Marcus musical shows.

Once Grace begged time off from Blackie to see the outstanding Marcus show of the season. She had hoped Al would appear, but he didn't. However, Molly was there as one of the featured performers, singing Al's words and melodies. Grace, leaning forward in her first row gallery seat, had to admit Molly put the songs over well. Molly was deft, graceful, self-possessed, and she knew how to get the most from a song's variations.

"Perhaps I was wrong in thinking she couldn't make Al happy," mused Grace. "She certainly knows her business and she is awfully pretty." Yes, Molly was pretty. Yet Grace's intuition told her, even from this distance, that there was something odd and calculating about her successful blonde. Her smile and gaiety made Grace distrust her.

But Grace caught herself up on these critical thoughts—perhaps, she reasoned, they came from jealousy. She determined to avenge them. They weren't fit for Molly.

Occasionally Al revisited Blackie Joe's and received congratulations from his old friends, but Molly never deigned to set foot in the place where she had started her climb up the ladder of fame. "That's Molly—too high-hat," murmured Blackie Joe to Grace in explanation.

Grace never forgot Al's first visit

often dissension. You and Molly are unusual that way."

Marcus gave a mysterious little smile and Al moved toward the door. "Molly's the one who's unusual—she's perfect!" said Al, and disappeared through the door.

He wondered what Marcus meant, by that mysterious smile, but dismissed it from his mind as he rode down in the elevator. Then he turned the corner, ran across the street, and entered another elevator to be whirled aloft to the Manhattan Roof. He found Molly in her dressing room, garbed for the street, chatting with John Perry.

John Perry was Al's best friend and a peculiar individual. The most peculiar thing about him was his mysterious source of income. He never seemed to work, yet he had plenty of money and spent it freely. Along the White Way they called him a racketeer and fought a constant, illicit distribution of contraband liquor in a district peppered with high class night clubs.

Physically he was decidedly prepossessing, being tall and dark. When Molly and Al had first arrived on Broadway, John Perry had sung their praises and done them a few little favors. Al, who liked everybody, had taken a decided fancy to John and soon found him talking over his songs with the debonair racketeer. Molly hadn't seemed to like John so much at first, but lately his charm of manner had won her over, and her attitude had been quite friendly.

Perry jumped up the moment Al entered and pressed out his hand. "Well, Al, old top, I've been visiting Molly. Hope you don't object."

"Not at all," Al dismissed the suggestion with a laugh and shook the hand. "I like Molly to meet other men. And you know, John, I regard you as one of my best friends."

John Perry raised his glance toward the ceiling, shrugged his shoulders, but did not answer.

"Shall we go, Al?" said Molly quickly and rather nervously. "We're waiting for you some time."

"Sure, right away," John was detained talking to Marcus about the new show. "I have arranged for you to have the pick of the songs. Where shall we go to a club or home?"

"Let's go home," Al said. "As they left the dressing room Al went first down the narrow corridor. John Perry followed him, and Molly's hand a surreptitious squeeze as she followed."

(To Be Continued.)

Weights Canadian Outlook

Bank of Montreal Says Other Items Will Offset Small Wheat Crop

Canadian prosperity will not be affected by the failure of the wheat crop this year because of numerous favorable features in the commercial field at large, according to a business summary issued by the Bank of Montreal. The report states the wheat crop at 300,000,000 bushels, with a possibility that it may not reach this figure, and that the smallest crop of wheat in Canada since 1924, when the yield amounted to 262,097,000 bushels. The report says:

"In the five years elapsed since the partial crop failure of 1924, a large development of Canadian resources, industry and trade has occurred, but business against a single untoward factor. In that period immense strides have been made in harnessing water powers, in new production, in motor-car industries, in the fabrication of iron and steel, in output of minerals and in all departments of domestic trade, aggregate wealth of the nation is greater than ever before."

Middle, formerly a slack season in business, now brings a large influx of tourists, whose expenditures enliven many branches, and this year the invasion is making a new high record. Viewing the commercial field at large, it can, indeed, be said that favorable features outweigh the unfavorable and that the volume of commodity production and distribution is at the highest level."

Forty Bird Sanctuaries

Forty bird sanctuaries have been reserved in Canada by the Department of the Interior under the Migratory Birds Convention Act, which is the Federal law for the protection of migratory birds. There are also fifty-one public shooting grounds reserved by the Dominion Government in Western Canada. Shooting is allowed on these latter areas in the open season.

Canada To Establish Prison For Juveniles

Money Voted For Institution Says General Hughes
Establishment of a penal institution for young people not hardened in the ways of crime will be brought about within two years, in the opinion of Gen. St. Pierre Hughes, inspector of Canadian penal institutions.

Although the matter has been dormant since it was first brought up in 1905, the Dominion Government has now appropriated money for the establishment of the juveniles, reformatory or penitentiary, and the institution will be established somewhere near Kingston, Gen. Hughes believes. Young people who must be punished, through this new institution, be segregated from older and more hardened criminals, instead of being thrown amongst them as is done under present conditions.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets and a few hours may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve those troubles if they come on suddenly. Baby's Own Tablets are not other medicine, from good, they are absolutely safe. They are sold by all druggists. They will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Seeking Northern Paradise

Adventurers From Washington State To Investigate Eskimo's Story
The existence of a far north paradise is hinted by Eskimos who told William Leyman, of Kotzebue, of a warmer continent with big rivers and fertile valleys beyond Bering Straits, according to officers of the steamship "Derby," arriving at Tacoma, B.C., from the Alaskan port on a first round trip this season.

As a result of Indian and Eskimo lore prevalent in Kotzebue, Leyman and several adventurers plan to leave by airplane to investigate rumors. The white men this summer watched wild geese fly far north beyond the Alaskan shores. This incident alone is a contention that warm springs or open water of some kind exists toward the North Pole.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

When tea is spilled on a tablecloth, over the spot immediately with salt. Let it stand for an hour or so. When the cloth is washed the tea stain will have disappeared.

Just Made Him Laugh

Plucky Navigator Not Dismayed By Nerve-Racking Experience

A young fellow sailed from Boston for France in a 116-foot open boat equipped with an outboard motor. His chief asset, says the Associated Press dispatch, appeared to be pluck.

Pluck, plus, he should say. What nerve such an undertaking requires! Yet there are plenty of men who have it. We recall in particular Capt. Howard Blackburn, of Gloucester, who once tried the Atlantic crossing alone in a 18-foot sail boat. Off the Grand Banks a storm came that threatened to sink the vessel, and that jammed the sliding door to the cabin so that for a time Blackburn couldn't shove it open to let himself out.

"How did you feel?" he was asked. "Well," he replied, "it seemed so ridiculous that I should die of what I just laughed out loud."

Little Helps For This Week

"And the Lord shall guide the continually, and satisfy thy soul in drought."—Isaiah lviii. 11.

My Shepherd is the Lord My God, His Rods He leads in verdant meads Where tranquil waters flow. He doth restore my fainting soul With His divine caresses. And when I stray He points the way To paths of righteousness.

—Eugene Field.

Through every step in life the Shepherd offers to guide us, if we will but hear His voice and follow Him. He never promises any paths, but He does promise safe ones. If we follow Him we may find the steepest cliff "a path of pleasantness," and the lowest humiliation as a highway to peace. —Theodore L. Cuyler.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages. It is the effort to dislodge obstructions that come from inflammation of the mucous membrane. The cough itself, with Dr. Thomas' Electric Oil will allay the inflammation. The cough itself, the cough will usually stop. Try it and you will be satisfied.

Use Natural Hot Water

Citizens Of Boise, Idaho, Supplied From Hot Wells

Heating problems have been solved for 200 home owners of Boise, Idaho, who have natural hot water piped into their houses. It is stated by E. E. Smith, vice-president and general manager of the Boise Water Corporation, in an article in the July issue of the Professional Engineer, monthly organ of the American Association of Engineers. The water comes from the Hot Wells, several miles east of town.

An acre of guano was noticed to be warm and never covered by snow in winter. Several men decided to prospect for water and after digging 400 feet found a good flowing supply of hot water. They dug another well, and the two produce 800,000 gallons a day. The water's temperature is around 170 degrees.

Saskatchewan Creamery Butter

The output of creamery butter in Saskatchewan for the first six months of the year is exactly 45 per cent. greater than for the similar half year of 1926, according to a report by taking Lydia E. Pinkham's Vegetable Compound. By their report, 98 out of every 100 report benefit. You can be almost certain that it will help you too.

Panama and Peru have just been connected by an air service.

Keep Minard's Liniment always handy.

Here are some of Christ's choicest Biscuits in delightful variety—every biscuit a treat. They are packed up in handy family packages.

Two Chicago Doctors Claim Production Of Anti-Knock Motor Fuel

"Gasoline" made from trees is announced in a report by the American Chemical Society by Dr. Jacques C. Morrel and Dr. Gustav Egloff of Chicago.

"They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel is now in the laboratory stage, the report says it can be made in commercial quantities from present wood waste."

"The development of a practical and economic means of converting wood waste into fuel for the future has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuel for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions."

"Approximately 24 per cent. of the standing trees is converted into useful products, while 76 per cent. is wasted."

"As an example of the possibilities of the utilization of this waste from an average annual yield of 7,000,000,000 board feet of Douglas fir the equivalent of 2,500,000 cords of 4,200,000 tons is available for destructive distillation, yielding the following:

"Turpentine and light oils, 8,000,000 gallons; tar, 70,000,000 gallons; wood alcohol, 9,780,000 gallons; acetate of lime, 187,500,000 gallons; charcoal, 2,440,000 pounds. And a large yield of gas for fuel."

"The 70,000,000 gallons of tar will produce by cracking according to present research, 23,900,000 gallons of motor fuel equal in anti-knock properties to benzine."

The estimate comes from a report following the Corn Remover. Try it

Canadian Sea Fish Catch

The Canadian catch of sea fish in the month of June 1929 had a landed value of \$9,361,822, which was an increase of \$500,000 over the similar month of last year, despite a reduction of 9,000,000 pounds in the weight of the fish caught which amounted to 280,200 pounds.

DOCTORS quite approve the quick action of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to the daily routine of the household; to great colds, sore throat, neuritis, etc. All druggists.

ASPIRIN

Aspirin is a Trademark Registered in Canada

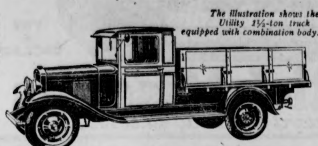

What most people call indigestion is usually excess acidity in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acid. But don't use cheap cheap. Use the best help is Phillips' Milk of Magnesia. For this is the only invention it has remained standard with physicians. You will find that it is as quick as it is harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no after-effects. Once you learn this fact, you will never deal with acid again in the crude ways. Learn now—why this method is superior. —"Oh, surely! Everything's perfect. Why do you ask?" "Oh, nothing—but you know in show business, where partners in marriage are both headliners there's

The New CHEVROLET Utility 1 1/2 Ton TRUCK

The Six Does Better What the Four did Well

TO the well-known Chevrolet qualities of stamina, dependability and economy, the new Chevrolet Truck adds the further advantages of smooth, six-cylinder operation . . . extra-rugged chassis construction . . . the superb speed and pulling power of a newly-designed four-speed transmission . . . ball-bearing steering mechanism . . . new, four-wheel brakes that are sure and positive in action.

Although it is a better truck, a sturdier truck, a truck that gives true six-cylinder performance . . . this new Chevrolet Utility Truck (with its 1 1/2-ton capacity) is still offered within the price-range of the four.

Ask for a complete performance and maintenance record of this amazing truck . . . and learn how it can save money for you. C177-R-25C

Mrs. W. V. Miller, Joan and Warren, returned to Oyen last Friday after spending a vacation at Saskatoon and Watrous.

Mrs. Charles Stewart and son Jimmy returned to Oyen last Saturday after spending a week visiting at the home of Mr. and Mrs. J. M. Taylor.

For Sale—One 15-27 tractor and one 20-41 separator, complete with all belts. First class condition. Price \$1075.00. Apply—W. V. Miller.

Mrs. M. G. Whitlock and daughters left last Sunday by motor for Dinsmore, Sask., where they will visit Mr. and Mrs. Fred Whitlock.

Dr. and Mrs. J. Kerr and family returned to Oyen this morning from the coast, where Mrs. Kerr and children have been spending a vacation.

Excavation For New United Church Done by Volunteer Work

Excavation for the new United Church was commenced yesterday and at noon to-day little remains to be done but the final levelling and excavating for the footings. All labor in this connection to date has been donated: the following contributing horses and labor: Mr. John Shields, Mr. Jim Kennedy, Mr. F. Horne and Mr. Ted Mahaffey. Rev. H. C. Woods was much in evidence during the work. He operated and also swung a handy pick.

This is a fine piece of work and the community spirit exhibited is most commendable.

Spirit of Optimism at Fuego

The Fuego well is now down over 2000 feet. The show of gas is increasing, and oil showings are becoming more pronounced. Last Friday a line well of about 3 1/2 feet was perforated by the drill and since then considerable line is showing in the formation.

Great credit is due the employees of the company for the way they have overcome the difficulties they had to encounter in this summer's operations. The well is reported to be in perfect condition; the casing is going down freely and the prospects of production are accumulating very rapidly.

A heavy flow of gas was encountered last night and is still showing this afternoon.

NOTICE

We, the undersigned, respectfully give notice to all concerned, that owing to the innovations and abstract doctrines now taught by the Reorganized Church of Jesus Christ of Latter Day Saints, and which we cannot endorse we have voluntarily withdrawn our membership from the above named organization, and do not consider ourselves longer members thereof.

June 17, 1929.
Margaret Mcgregor,
Herbert F. Kidd,
Irene May Kidd.

Here and There

(576)
Two scholarships at McGill University, Montreal, covering five years' tuition for employees who are minors or minor sons of employees have been awarded by the Canadian Pacific Railway this year, one to C. P. Sturges, son of E. F. L. Sturges, assistant general passenger agent and the other to William P. Daulton, son of John P. Daulton, of the pension department of the railway at the head office in the company. The scholarships provide for one year's tuition in the faculty of arts followed by four years' tuition in architecture, chemical, civil, mechanical or electrical engineering.

Right Hon. Winston Churchill, Chancellor of the Exchequer in the late Baldwin Government in Great Britain, arrived in Canada recently on the Empress of Australia and made a tour of the country from Montreal to Victoria. He visited Toronto, Hamilton, Niagara Falls, Winnipeg, Regina, Edmonton, Calgary, Banff, Lake Louise, Steamboat, Vancouver and Victoria. He will leave the latter city September 2 arriving at Seattle the same evening. He travelled Canadian Pacific railway and steamships during the whole of his trip.

Purchased for a sum in excess of \$50,000, an oil painting of Lord Peterborough in Sir John Van Dyck, court painter to King Charles I, was carried by the Canadian Pacific Express Company by steamer Montreal to Montreal recently, very special precautions being taken to ensure safe delivery. It was bought by A. J. Nisbet, prominent business leader of Montreal.

The Sportsman's Paradise
PROTECT IT AGAINST
FIRE

Green forests ensure an even flow of clear running water; burned timber means muddy torrents in flood time and stagnant pools in dry weather.

The good sportsman, in his own interest, is careful with fire in the woods.

Issued by authority of
Honourable
Charles Stewart,
Minister of the Interior.

Fifty Years of Progress

Locomotive number 5900, greatest in the British Empire, one of a fleet of twenty for use on the heavy grades of the British Columbia mountain, has just been released for service on the Canadian Pacific Railway.

It weighs close on three-quarters of a million pounds with engine and tender and having a length of 98 feet over all, it furnishes an overwhelming contrast with the wood-burning "Countess of Dufferin" which came to Winnipeg from Minneapolis, fifty-two years ago next October.

Tireless effort of the Continent was 1,000 lbs., as compared with that of 78,000 lbs. of the 5900. The latter represents the latest developments in locomotive engineering and was built to specifications furnished by the motive power and rolling stock department of the Canadian Pacific Railway.
